DETAILED ACTION

1. This action is in response to the communication 12/21/2007. Claims 1 – 25 and 27 – 34 are currently pending.

Response to Arguments

2. Applicant's arguments filed 10/9/2007 have been fully considered and Examiner Paula Klimach stated that when combined, prior art Roberts (6,931,128) and Hawthorne (5798381) together, teach "creating, at the transmitting set, a bitstream ... generating, at the transmitting set, an encryption signal based upon the session key". However the combined prior art even when taken together, do not teach the claimed invention. Applicant's argument with respect to prior art rejection is persuasive and Examiner withdraws prior art rejection.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1 – 25 and 27 – 34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 – 10 of U.S. Patent No. 7,123,593. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter claimed in the instant application is fully disclosed in the

patent and in the instant case all elements of Claims 1 – 25 and 27 – 34 correspond to Claims 1 – 10 of U.S. Patent No. 7,123,593.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO Form 892.

Applicant is urged to consider the references. However, the references should be evaluated by what they suggest to one versed in the art, rather than by their specific disclosure. If applicants are aware of any better prior art than those are cited, they are required to bring the prior art to the attention of the examiner.
